

The longitudinal profile shows the road's elevation relative to the terrain. Key features include:

- Altitudes TN (m):** 413.41, 413.15, 413.31, 413.49, 413.71, 413.48, 413.30, 412.97, 412.22, 411.69, 411.35, 411.04.
- Dist cumulées TN (m):** 0.00, 2.54, 12.70, 14.83, 17.88, 20.15, 21.79, 27.56, 31.26, 39.08, 44.11, 52.68.
- Altitudes PROJET (m):** 413.47, 412.90, 412.92, 412.92, 412.92, 412.92, 412.92, 412.92, 412.92, 412.92, 411.23.
- Dist cumulées PROJET (m):** 11.22, 15.80, 23.24, 30.29, 39.08, 45.29.
- Slopes:** PENTE L = 26.80 m P = -0.00 %, PENTE L = 6.69 m P = -20.73 %.

Longitudinal profile of the road project. The profile shows the transition from the natural ground (Tremis naturel) to the project grade (Tremis gras). The profile includes a 'Noue et cheminement' (ditch and path) section with a depth of 0.91 m and a 'Tremis gras' (fatty trench) section with a depth of 0.39 m. The profile is defined by a green line for the natural ground and a black line for the project grade. The horizontal axis represents distance along the road, and the vertical axis represents elevation in meters.
